Meeting to Organize Athletic Union, Monday, July 31st.

A meeting will be held in the office of the Atlas Lumber Co. Ltd. on Monday evening at 8 p.m. sharp, for the purpose of organizing a branch of the Amateur Athletic Union of Canada in Crossfield.

We have been fortunate in securing the co-operation of the Provincial Branch Secretary, Mr. E. W. Bellamy, who will be in attendance, and it is earnestly requested that all boys and girls who wish to join forces with us, will so signify either before, or at this meeting, and that all parents will take an active interest, and turn out in full force to discuss the matter thoroughly.

NEWS BRIEFS

Dannie High, 13-year-old son of Mr. and Mrs. E. D. High, met with a peculiar accident on Tuesday evening while in the act of taking the cows home from the pasture. It is thought that his saddle pony stumbled and fell, knocking him unconscious for some time, the pony being lame ever since. Dannie is confined to bed but is getting along nicely under the care of Dr. Whillans.

Freland Wilford, of Staveley, won the world's wheat championship at the World's Grain Exhibition at Regina with a specimen of hard red spring wheat of the Revard strain. Treble was second.

Restrictions placed on dance hall hours under an order in the early part of June by which public entertainments were required to close at 1 o'clock on week nights, have been lifted by an order-in-council, which leaves the hours open to any time desired. It is still required however, that dance halls shall be closed from midnight on Saturday to 8 a.m. Monday. The prohibition of minors under 18 years of age at such entertainments, unless accompanied by parents or guardians has been cancelled.

Harold Walsh of Madden, won first money in the calf roping contest and second money in the bucking horse competition at the Alaskan, Sask., Stampede on July 21.

The Crossfield Tennis Club will defend the "Quo Vadis" challenge trophy recently won by them at the district tournament held at Carstairs. A challenge has been accepted from the Carstairs Tennis Club and the matches will be played on Wednesday afternoon, Aug. 2nd.

R. W. McFarlane, former manager of the Alberta Pacific elevator here has taken over the management of the Pioneer Grain Company elevator at Vulcan.

A church conference deplores that in a depression year we drank thirty-eight million dollars worth of liquor. We acknowledge the corn but again we have to plead in self defence that the federal and provincial treasuries swallowed much of that money.

The hall at Carstairs was filled to capacity on Friday last to hear Wm. Aherhart, B.A., of Calgary, give his lecture on the Douglas System of Economics. Many from Crossfield and district were in attendance.

J. E. Williams of Duffield, Alta., visited his brother Mayor Williams on Wednesday, leaving on Thursday to visit another brother in Calgary who is seriously ill. Mr. Williams has been a resident of the West for the past forty years and made his first trip through Crossfield in 1904.

Frank Collicott & Son carried off the major prizes on Herefords at Edmonton Fair, last week.

Wheat dropped 26 cents in Chicago in two days, and in Crossfield 24 cents in four days, last week.

1200 ATTEND DOG POUND STAMPEDE AND SPORTS

The twenty-seventh annual Stampede and Celebration at Dog Pound on Wednesday, was attended by a crowd of around 1200 people in spite of the extreme heat. A good line of principal sports is always provided and well looked after by those in charge.

While the various athletic events and horse races had their share of adherents, the stampede events proved a great drawing card, with a large number of contestants in each event.

Following were winners in the stampede events:

Bucking Contest—1, Douglas McDonald, Crossfield; 2, Gordon Kemp, Cremona; 3, Joe Gray, Dog Pound and Geo. Myhill, Cremona, were tied and split third money.

Calf Roping—1, Chappie Rodgers, Dog Pound; 2, Jimmie Leask, Madden; 3, George Leask, Madden. Wild Cow Milking—1, George Leask and Donald McInnes; 2, Bill Gray and Bert Boncock; 3, Jack Hill and George Beatty.

M. M. Boucher of Bottrel won first money for the best bucking horse with "Socks," while Frank Winchell of Bottrel, got second with "Slippery Slim."

Dog Pound defeated Bottrel in a five inning game of baseball by a score of 3-1. Fred Wilson on the mound for the winners, whiffed ten and was touched for only three hits. Errors behind Pratt were costly.

Wilson and Stahl were the battery for Dog Pound, and Pratt and Bunt for Bottrel.

The jitney dances on the open air platform among the trees was well patronized. Trippers of the light fantastic could not resist that peppy music furnished by the Melody Boys and the dance went on until early morning.

Crossfield turned out in full force to the stampede and sports at Dog Pound on Wednesday, and many from all parts of the district look on this event as annual holiday. The program was well carried, and everyone had a splendid time. We hope by next year to see the stampede corral in better repair and also some much needed improvements made to the race track and baseball grounds.

BONE DRY

Constable Fein, R.C.M.P. was on duty at the Dog Pound Stampede on Wednesday and drunks of any kind were conspicuous by their absence, in fact one of our local totallers, who can generally locate a crock when away from home, failed to land even a shot of moon. He of course blamed the cause of the drought on Fein.

District Crop Report

In this district we believe we are passing through, possibly, the hottest, driest period that has been experienced to date.

The western portion of the district has a very fair crop in prospect, and barring continuous adverse weather conditions, will produce a fair crop.

The eastern portion has a number of very fair crops and some are very questionable. However the grain is filling beyond expectation, and there will be close to a 50 per cent crop.

Some cutting will be done within the next ten days.

LEGION PICNIC

Arrangements are being made to hold the picnic at Dog Pound on Thursday 3rd. August. Meet at Fire Hall, Crossfield at 11.30 a.m. Bring lunch and necessary cups, etc.

Those having accommodation in their cars please notify D. J. Hall or Fred Stevens.

This is a children's day and your co-operation will help make it enjoyable.

Life Means Change.

Occasionally the writer of this column feels the urge to pass on to the readers of it some thought, or idea, or even complete article he has come across in his own reading. In surrendering to that urge this week, we pass on an article appearing in a little United States magazine which does not go into general circulation, which has no subscription list, but which is distributed free to a selected list of people in all parts of the world. That article follows:

To prepare us for life in a world that is continually changing, that is a very small part of a universe in which nothing is or ever will be static even for the space of one brief second, humanity has been taught, from the earliest dawn of reason, to strive for permanence, security, safety, ease, something which we may accept as settled. Thus we find ourselves mentally and spiritually unprepared to meet the apparently sudden, unexpected changes which follow inevitably upon some wide-spread emergency. Instead of schooling ourselves to meet emergencies in their varied and unpredictable phases, we have preferred to be lulled or to lull ourselves into a sense of false security, to surround ourselves with an atmosphere of spiritual anaesthesia. Instead of taking life as a tremendous adventure—and it is this or nothing—we decide ourselves into the belief that we have made of it something restful, secure, that we have created, in some measure at least, a lasting order of things. And we commit the added absurdity of telling our children that these things are so, when our whole experience, the experience of all humanity proclaims them to be utterly false.

How different would have been our reactions to the experiences of the last three uncommonly trying years had we been free from the traditional fear of change. And why should we fear change when it is the most certain thing that life brings us? It is the very essence of life; the vital germ of growth; the stimulus toward achievement; the point of far-flung outlook along the road of progress. Change gives life its vitality; lends it sparkle and variety and the lure of glorious adventure; makes it worth living to those who have learned the most precious, most helpful of its secrets. Acceptance of this fact is the one royal way to spiritual freedom, and in spiritual freedom lies the only assurance of surety, of permanence, of safety, of ease to be found in all the range of created things. For only when the spirit is free—free from delusions and superstitions and intolerance and fears and traditions and narrow prejudices and selfishness—free to venture where it will and when it will, is it prepared to meet, with profit to itself, the ever unexpected possibilities and adventures of life. The accumulation of these spiritual profits is the one sure laying-up of treasure where neither moth nor rust can corrupt, and where thieves cannot break through and steal. It is the one treasure not subject, except in enhancement, to the vicissitudes of life.

The chief thing in living is life itself. The chief purpose in life should be to live it abundantly, joyously, zestfully; to savor each of its constantly varying phases; to get all we can out of it and to put all we can into it. We should not fear to meet any part of it. We should prepare ourselves for the realities of life, frankly admit them as realities, and reap the fullest possible advantages from them. And if we do this we shall come to the inescapable conclusion that the genuinely desirable advantages of life have little if anything to do with material things.

If we would enjoy life to the full, we must change our traditional attitude toward it. Instead of building upon the illusion of permanency, we must build upon the certainty of change—constant change both within ourselves and in all other created things; physical, mental and spiritual change. For without change life could not exist. To imagine any possible permanency in life, anything static, anything unchanging even for the smallest period of our conception of time, would be to imagine our most fearful and hopeless conception of death. And life knows no death, only change, and continuing life.

There is no thought in anything I have said here that we should not strive intelligently and courageously for some measure of stability, some temporary standard of thought and action, in our material affairs; but that in our thinking, our planning and our striving we never should for a moment lose sight of the realities of life, and that neither permanency nor absolute security is one of them. Our ideas of security, of any settled order of things, should be relative. They should be held loosely and subject to the certainty of change. In other words, we should prepare ourselves for change as for the one sure thing which life offers us. Our accumulations of things material should be secondary to our accumulations of things spiritual. The insecurity of material accumulations should make us value more highly the security of spiritual accumulations—our experiences, our mementoes, our generous and friendly impulses, our unselfish and tolerant motives, our whole attitude toward our fellows, our confidence in the eternal beneficence of life, our love of what is good, our desire for continuing human betterment, in short, all that our experience has taught us is most to be desired. Let us then accept life frankly as a glorious adventure, and face it at all times cheerfully and bravely. Let us banish fear, fear of present insecurity, fear to venture because of uncertainty, above all else, fear of change. Let us be constantly prepared for change, ready to take advantage of it rather than to have it take advantage of us. Let us live our lives to the full and go forward cheerfully, bravely, confidently, and with light and hopeful hearts.

Some Birthday Dinner

Peter the Great, three tons of hippopotamus is 30 years old and Bronx zoo officials prepared his four-course birthday dinner. The appetizer was a bushel basket of mangos. In lieu of soup was served a bowl of young corn stalks. Entree consisted of two loaves of brown rabbit bread. And the piece de resistance was Peter's standard dinner, 100 pounds of hay.

Drouth is threatening crops in parts of Honduras.

Summer Complaint Plays Havoc With the Bowels

Many people escape an attack of summer complaint. It may be slight or it may be severe, but both the young and the old are liable to it during the summer months. You cannot tell when it seizes you if it is going to end. Let it run for a day or two and see how weak and queasy it will leave you. On the first sign of an attack of any looseness of the bowels take a few doses of Dr. Fowler's Extract of Wild Blackberry and see how quickly it will give relief. Manufactured only by The T. Millburn Co., Limited, Toronto, Ont.

Botanists Are Interested

Awaiting News Regarding Discovery Of Musk Plants In B.C.

Botanists everywhere are awaiting eagerly news concerning the musk plants with the long lost odor on Texada Island, B.C.

In connection with the reported discovery by Stanley Boys on Texada Island, on the British Columbia Coast, of a musk plant carrying the distinctive odor common over twenty years ago but since unknown, Dr. Arthur W. Hill, director of the Royal Botanic Gardens, Kew, England, is keenly interested.

Dr. Hill has written to Frank Kermod, of the Provincial museum of natural history, Victoria, saying the discovery, if it can be substantiated, is of every great scientific interest. He asks that if possible seed or plants with a strong musk scent may be forwarded to him at Kew, and gives instructions for their safe packing for the journey and outlines special precautions to be taken in forwarding them.

The musk of the odor well remembered by most persons of English upbringing—it was common as a pot plant for houses in England a quarter of a century ago—is said to have been taken to England originally from British Columbia by the famous Douglas whose name is perpetuated in our Douglas fir.

It is given as having originated on the American continent by authorities. It had commercial value for perfume manufacture years ago and there are commercial possibilities about its rediscovery in British Columbia apart from world-wide scientific interest.

Home For Orphan Boy

Adopted By Wealthy Couple Whose Dead Son He Resembles

The home of a wealthy silk dyer and such advantages as a college education were ready for a 13-year-old orphan boy from Omaha, Neb., in what seemed like a modern version of the old story of Cinderella and the prince.

The boy was Peter Christophols, and inmate of Father Flanagan's Boys' Home near Omaha. A picture of the lad, an orphan since early childhood, was the medium through which he has become just like a son in the home of Mr. and Mrs. Jean Strengs, who live at Paterson, New Jersey.

It seems that Strengs saw the picture of Peter and was struck by the resemblance of his son, Henry, who was drowned in Green Pond, N.J., a little over a year ago. As a result, arrangements were made to bring Peter in the Strengs household to take the place of the dead boy.

Farming On Small Scale

Has Proved Best During These Times Of Depression

Large-scale farming is a worth noting, is no longer being advanced as a cure-all for agricultural ills. It is not so many months since farmers were being told that agriculture's salvation could only be attained by mass production on very large farms, and fears were being expressed that the small farmers would lose their individuality and become something approaching serfs. But the depression has changed all that, as it has changed many other things. The small farmer is managing to get along in some way or other, but the large scale farmers have gone broke or shut up shop.—Brookville Recorder and Times.

Prairie Wheat Sales Higher

Show Substantial Increase Over Corresponding Period In 1932

Prairie wheat marketings showed an increase of 2,651,379 bushels over the corresponding period last year for the week ending June 22, according to Dominion Government figures released this week.

Total marketings for the crop year to date were 356,742,219 bushels as compared with 259,022,190 a year ago. For Saskatchewan the year's sales were 180,485,507 as compared with 115,863,889.

Still Very Much Alike

Sir Murchison Fletcher, High Commissioner for the Western Pacific, who has been visiting London, went to Tonga Island last September to present the Queen with the D.B.E. conferred upon her by King George. He was met on the beach by a tortoise which Captain Cook gave to the Queen's great-great-grandfather in 1774. Sir Murchison stated that the tortoise is very much alive and that he fed it with bananas.

Germany has a "renovize" campaign.

More Aeroplane Passengers

Business Increasing On U.S. Lines and Competition Is Keen

The skyways of North America are being "double tracked."

A survey of major air lines carrying passengers to every corner of America—and of every corner to extend across the ocean—showed that commercial aviation has increased its passenger income by one-third in recent weeks.

The reason: Renewed activity in general business and loss of what aviation men call "air anxiety" by the public.

The result: A battle for the new business comparable to that of the railroads several decades ago. In the scramble for passengers, millions of dollars have been poured into new equipment. Soundproof cabins have been evolved by United Air Lines. American Airways has responded with ships in which passengers can sleep on comfortable berths during night trips between Chicago and the Pacific Coast.

A smaller line, Northwest Airways, has ordered a fleet of "planes capable of 215 miles an hour with a cruising speed of 180 and announced a plan to compete for business between Chicago and the Pacific northwest. At the coast, Northwest will connect with Pan American Airways, which plan to extend its present lines to Alaska across the Arctic to Asia. At present, Northwest operates between Chicago and Montana and northward to Winnipeg, Man.

As proof of increasing business the Chicago municipal airport announced that 6,927 passengers were carried out of Chicago on regularly scheduled trips during June, an increase of 10 per cent from a year ago.

Many licensed pilots have obtained employment in the past few months, air line officials announced, because of additional "planes placed on schedules."

Trips between Chicago and New York have been doubled by three lines. A traveller between the two cities now has a choice of more than 20 "planes daily, the time of the schedules ranging upward from four and three-quarter hours eastbound to five and one half hours westbound.

Recovery Program

Plans Formulated In United States To Assist Workmen

With almost 1,000,000 mill workers tackling their jobs under the stimulus of higher pay, plans were fashioned by the United States industrial administration for summoning the whole force of public opinion behind the Rooseveltian endeavor to open more jobs and fill additional salary envelopes.

Hugh S. Johnson, industrial administrator, called in his staff of advisors to check over every detail of the preparations for a campaign modelled after the Liberty Loan drives of the Great War days to unite the citizenry behind the recovery efforts. Secrecy surrounded the formulation of the plans.

A national campaign now in the making would seek even more informal, purely voluntary wage-raising and hour-cutting action, along the lines of that taken by the steel industry in increasing wages 15 per cent today, without waiting for an executive order by the president.

A strong appeal from President himself might form the centre of the movement. It also was considered possible that he might, in this, recommend general hour limits, and advise what minimum wage levels should be.

Located Lost Galleons

Pirate Loot Within Grasp Of An English Adventurer

Treasure buried long ago by pirates who had stolen it in raids on merchantmen is believed to be within the grasp of an expedition led by Stratford D. Jolly, an English adventurer, who, with his party, set out from Brixham more than a year ago in a converted steam trawler. At least, Jolly believes the treasure is within reach. He has returned to England for a short time, but will continue the search in another vessel the trawler having been sold.

One of their party, Frank Cooper, who gave up a post in the glove-manufacturing industry at Yeovil to join the expedition as gold diver, was able to locate at Trinidad a number of sunken Spanish galleons, which were scuttled in 1797 to avoid capture by the British Fleet, according to Jolly's story.

Finding the galleons, he said, was as easy as could be for Cooper, who used for the purpose only a gramophone spring. "That Cooper's work was successful we know," said Mr. Jolly, "because we took soundings and were able to trace the actual shape of the sunken ships. They are down in only seven fathoms of water—a depth easy for divers to work in—and, above all, they are in a very sheltered part."

Wanted To Look Around

Prince George Climbed 180-Foot Scaffolding Beside "Big Ben"

Prince George demonstrated remarkable nerve before a small crowd of people when he climbed up the job-like scaffolding surrounding Big Ben's tower at the House of Commons. No one looking on knew who the "human fly" was. To them it was simply a young man in a gray suit.

The prince had expressed a desire to climb up the ladders from platform to platform until he reached Big Ben, and then have "a good look around." Accompanied by two of the men engaged on the scaffolding work, he reached the highest point. After a few minutes he climbed over a parapet leading to the gallery where the bells that chime the quarters are installed. The prince ascended by means of a long spiral staircase inside the tower.

"Climbing the ladders to such a height is not an easy job for one not accustomed to the work," an official told a reporter. "But the prince got up very quickly, and showed fine nerve. He told us that he thoroughly enjoyed the experience." During the climb up steep ladders from which, when glancing down, he could see nothing between himself and the ground. In many places the scaffolding upon which he had to walk consisted only of a couple of planks.

Russia's New Fast Train

With a new idea for locomotives, S. B. Vaidner, an official scientist of the Russian transport commissariat, has invented an exceedingly fast railway engine which is called an "aero-train." The prefix "aero" is a trifle misleading, because the locomotive does not fly, but the term is intended to describe the engine as of the aeroplane type, with propellers. It is stated that the train is stable at a speed of more than 150 miles an hour.

Savers in Japan are transferring their money from postal banks to commercial institutions which now offer a higher interest rate.

Ceylon's First Woman Lawyer

Nineteen Year Old Girl Was Brilliant Scholar In London

Among those to pass the examination for call to the English Bar is Miss Aravinda Mehta, of Colombo, Ceylon.

Miss Mehta is only 19 years old, a slim Parsee girl from Ceylon, whose appearance would give the impression that her school days were hardly over yet. She was a brilliant scholar at the Maria Grey Training College, London, England, and after she matriculated she read for the Bar in Lincoln's Inn.

I saw her at her home in Hampstead, where she is living with her mother—writes an Evening News representative. She was wearing a native dress of blue and gold.

"I shall be the first woman barrister in Ceylon," she said. "There are, of course, a number of women lawyers in India, but up to now there have been none in my own country."

"I am eager to begin work at the Bar in Ceylon, but I have to wait some time yet before I can do that. I cannot be called until I am 21, and I have to eat my dinner for three more terms. I may go to India first and practice there for a time before going to Colombo."

Miss Mehta said there was no branch of the law in which she took especial interest and her practice would be a general one. Her father is a marine superintendent at Colombo, and one of the few Parsees in Ceylon. "There are only 200 there," she said, "but there are 100,000 in India."

Matter Being Considered

Train Ferry May Be Inaugurated Between England and Sweden

A train ferry between Sweden and Britain may be inaugurated, if present plans materialize. A minimum capital of one-half million kronor already has been subscribed, due to the confidence with which the project is regarded in Britain.

Drawings for the ferry have been made and the boat is estimated to cost 3,500,000 kronor and have room for 84 refrigerators cars, 10 freight cars and 480 first-class passengers. The Swedish terminal will be Varberg.

It has been suggested that during the summer months the ferry make an intermediate stop at Copenhagen.

Hardly Necessary

With the nations feeling the way they do about each other, what need is there for trains that go 110 miles an hour and airplanes that go 250 miles an hour? It must be that we are perfecting communications in order to get away from each other as fast as we can.

The production of potatoes in Canada in 1932 amounted to 39,416,000 cwt., the smallest yield recorded since 1916.

Gigantic Battle Against Bovine Tuberculosis Being Waged By The Department Of Agriculture

Over 1,000,000 tuberculin tests were conducted on cattle in Canada during the past year, it was stated by Dr. G. H. Hinton, veterinary director-general of the department of agriculture. Almost 1,000,000 cattle will be tested this year and between 10,000 and 15,000 new herds added. With Canada's cattle population approximately 5,000,000 and her milk cow population slightly over the third of the total, the battle to free Canadian herds from tuberculosis is a gigantic one.

The department is discontinuing altogether this year compensating farmers whose cattle react to the test if they are under the municipal tubercular order. However, under the other policies the compensation will be paid as heretofore.

The object of the department is not primarily to protect the health of the public by this battle against bovine tuberculosis. The protection of the health of the people is a provincial and municipal matter. It is for the provincial and municipal authorities to see that milk and milk products, free from tubercular germs, are provided to the consumers of the Dominion. These authorities are responsible that the pasteurization is effective and impure milk kept from the public.

The primary object of the agricultural department is to "reduce the economic losses in livestock because of tuberculosis."

When the fight against bovine tuberculosis first started in this country, it was in what were known as supervised herds. In this the government tested the herds but did not pay any compensation for the cost of the tests that were made out. That is still in force and nearly 20,000 herds will be dealt with this summer.

Then came the municipal plan in 1914. Under it a municipality took steps to insure that all the milk sold within its borders was from tubercular-free herds. The government tested any herd from which milk was sold to the corporation making the application. Some 28 municipalities originally went into the scheme and the government tested the herds. The farmers were compensated for loss of the reactors.

For some time it has been felt that this was a very ineffective method of fighting the disease and very expensive. Accordingly some eight or nine years ago the department decided to carry on with the municipalities already in the scheme but to accept no more applications. Now, however, the entire scheme has been dropped in favor of the restricted area plan, the accredited herd plan and the supervised herds.

One of the arguments against the municipal plan was that only herds supplying a certain municipality would be tested. All around it were cattle in herds not so tested. The owner of the tested herd was continuously replacing milkers in his herd with milkers he bought elsewhere. The result was that the herds would not stay free of the disease and the number of animals which had to be slaughtered was great with a correspondingly heavy compensation bill for the government with very little progress.

Under the restricted area plan however entire areas are cleared of tubercular cows and county after county has gone in for this plan with its compensations.

The accredited herd plan, an international agreement whereby herds with purebred animals for sale are tested and compensation given for animals destroyed will remain in force.

Much Depends On Teacher

The "little red schoolhouse" is not yet extinct. A recent survey shows that 60 per cent. of the public school buildings in use today in the United States are of the one-room variety. In Canada, the percentage is even higher. And probably the children in them get a pretty fair education. The odds are not wholly in favor of the fine, graded city schools. More depends upon the teacher than upon the school.

Exchanging Courtesies

The days rugged of journalism are not over. Down in Nova Scotia the Evening News of New Glasgow said there were four goats in the livestock census of pious county, "not counting the editor of the Eastern Chronicle," and the latter retaliates by remarking there were 3,549 swine and "should that not read 3,500 including the editor of the Evening News?"

W. N. U. 2004

To Enforce Act

Grading and Stamping Of Bees On Compulsory Basis In Saskatchewan Saskatchewan is putting teeth into the Federal Livestock and Livestock Products Act, which provides for the grading and stamping of bees.

By a provincial order-in-council, passed on June 6, the regulations contained in the federal order-in-council which has been in effect for the past two years, have been made compulsory.

In other words, the regulations, together with the regulations, are now placed on a compulsory basis with the onus on enforcement upon the federal government.

Publication of the provincial order-in-council, together with the regulations, as set out by federal enactment are controlled in the current issue of the Saskatchewan Gazette.

First Impression

Biggins visited London for the first time, and on his return was asked by his friend Smith what struck him first about the Metropolis.

"The traffic," replied Biggins, "and my next impression was a cool hand on my brow, a smell of antiseptic, and a voice asking me if I felt better."

Winnipeg Newspaper Union

By Ruth Rogers

LOTS OF GRACE ABOUT THIS JUMPER DRESS WITH TRAY SHOULDERS

An interesting feature is the soft becoming neckline. Its lines are slenderizing too.

Soft crepe silk, either plain or printed, are lovely for this model. Carried out as the original, you'll use plain crepe silk in beige for the dress with a brown and white print for the gumpie.

Red and white crepe silk print jumper with plain white gumpie is cute idea.

The dress can also be worn without the gumpie. Its simple styling makes it very suitable for cotton fabrics and tub silks in white or pastel shades for your summer wardrobe.

Style No. 732 is designed in sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 38-inch material for dress with 2 1/4 yards of 36-inch material for blouse.

Price of pattern 30 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Complete Cooling Of Milk

Desirable To Have It Done Quickly As Possible

While milk should be cooled as promptly as possible in certain cases the morning's milk must leave the farm so early that complete cooling is impossible. Often the only alternative is to hold this milk over until next morning before shipping since certain milk companies and cities still require all milk to be below a certain temperature on arrival. In more progressive communities it is realized that the fresh milk, although warmer, is more desirable than the older milk, and regulations have been framed to allow for the acceptance of uncooled or partially cooled morning's milk which is not more than two or three hours old on arrival at the plant. During this period the substance in freshly drawn milk known as lactenin serves to restrain bacterial growth. However the exhaustion of the lactenin from delay in cooling ultimately results in a shortening of the time the milk will keep. Hence it is highly desirable that the cooling process be carried out as far as possible before the milk leaves the farm.—Dominion Agricultural Bacteriologist.

Western Forage Crops

Pasture Crops Occupy Only About Five Per Cent. Of Cultivated Land

The amount of cultivated land devoted to forage crops in the three Prairie Provinces has been relatively unimportant as compared with the total area which has been seeded annually. The statistics which are available show that hay and pasture crops occupy to the neighborhood of five per cent. about half of which, or 1,000,000 acres is improved pasture. These figures taken by themselves, however, says Dr. L. E. Kirk, Dominion Agronomist, are misleading in that they do not include cereal crops which are pastured or harvested in the sheep for hay. The latter in Western Canada is very important. Oats alone are grown more extensively for feed than all other forage crops combined. No estimates are available of the uncultivated pasture lands, which are very important also and are chiefly responsible for the limited acreage of improved pasture. About 7,000,000 acres of ranching country are leased for grazing purposes.

New Type Of Street Car

A new type of street car, capable of a speed of 40 miles an hour, has been built in Blackpool, England. It has a stream-lined body, a sliding roof, headlights and horn like a motor car, doors at the sides for quick loading and unloading. The car, which has cost \$2,000, can be electrically heated in winter. It has been built largely to the design of Blackpool's new transport manager, W. Luff.

A Resourceful Trader

Tom Harvey, veteran trader of Cumberland House, 100 miles west of The Pas, Man., has created a new record for unusual freighting nights on the Saskatchewan River. Mr. Harvey needed a dwelling near his store, and having one in The Pas, decided to move it into the hinterland. It was loaded on two scows and towed by gasoline tug.

An Example To Europe

Norse Countries Have Preserved Peace For Over Century

For more than a century peace has reigned in the Scandinavian and Baltic countries. No war has ruffled the neighborliness of these nations for almost 125 years.

Sweden, Norway, Denmark and, further south, Holland, practiced the spirit of the Briand-Kellogg anti-war pact for more than a century before that document came into existence, a political writer on the daily Morgenthaudinger reminds his readers. There is no counterpart to this phenomenon in the rest of Europe, he says.

Two facts he regards as especially interesting are that this north-western peace atmosphere of Europe has not arisen from written treaties, but from an attitude of mind and that it has shown a tendency to stop the spread of European thunder storms to the north-west and will most likely continue to do so.

Carries Radio-Phone Set

N-New Idea For Reporters Is Giving Entire Satisfaction

New idea for reporters is giving radio-telephone set has received its baptism of reportorial fire and acquired itself admirably.

The set weighs 35 pounds and is carried on the back of a reporter. It has a sending range of about four miles. It uses less than two watts power and operates on ultra-high frequency waves.

The midget set received its first real test under actual reportorial conditions, when used by George Kirksey, sports writer, during the A. A. U. track and field championship at Chicago recently. Using the set Kirksey was able to flash to his telegraph wire located at the judges' stand the results of many events even before the A.A.U. timers could cover the distance from the finish lines to the judges' stand.

Comfort For Spectators

Winter Sport Enthusiasts In Switzerland Enjoy Heated Grandstand

Grandstands for the accommodation of winter sport enthusiasts in Switzerland are now being heated electrically. In one such being, insulated cables are placed in rows of three under the seats. The strips radiate a uniform heat, and only a short time is required to heat the entire stand in this manner. In order to avoid short circuits, every cable length is grounded through an automatic switch which immediately disconnects the endangered section. The current is supplied by the same power plant which makes the artificial ice for the skating rink or other sport.

Danced For Rain

Who said there wasn't anything to this thing of dancing for rain? Recently there were a few skeptics at the latest Indian Pueblo, Albuquerque, New Mexico. They scoffed, but in a few minutes it rained so hard that the skeptics couldn't see the dancers. The Indians must have overdone themselves, for flood waters from an arroyo covered about 1,000 acres of their land to a depth of several feet.

VINE'S CONQUEROR IN ACTION

Here is an excellent action picture of Jack Crawford who performed the iron man feat in the final of the All England Men's Singles Lawn Tennis Championship by defeating Ellsworth Ellis, United States titleholder. Crawford, who hails from Australia, has been in the front ranks of tennis stars for a number of years but this is the first time he has won the British title. The match between the Australian and United States champion went to five sets with Crawford showing much superiority in the final set.

Scientific Investigations Will Feature Work Of Government Expedition To Arctic Archipelago

Concerning Sleep

Scientists Investigating a Most Profound Subject

Sleep that slides into the soul is not always voluntary even to those persons who have their consciences under perfect control. Sleeplessness, might have its brighter side if human beings were kind enough to listen to the tale next morning of how "I hardly slept a wink last night," but they never are. Dr. A. T. Mathers has been talking the whole thing over with the Pacific Northwest Medical Association at its meeting in Vancouver.

It appears that the same old flock of sheep are still doing duty. Well, perhaps not the same flock, for the Doctor seemed to be "choosy" about his sheep. Quality is what he wants. He advised every non-sleeper to make sure of each sheep before it passed through the gap or over the fence. Give each one a careful once over, is the Doctor's recommendation. But how is the uninitiated to tell one sheep from another unless it be the blacks from the whites? The speaker made no suggestion along this line. Further, the Doctor said that if he could fall back on hot today if the wool market broke.

Take it all in all, the sheep and today are not very new ideas. If science really wishes to do its stuff it might suggest how to secure at twelve p.m. the delicious sense of drowsiness that enfolds one about eight a.m.—Winnipeg Free Press.

Ration For Growing Pigs

Meal Mixture Recommended By Dominion Department Of Agriculture

For growing pigs, 80 to 150 pounds live weight, the following meal mixture is recommended by the Swine Division of the Dominion Department of Agriculture: Ground oat, 200 pounds; ground wheat, 200 pounds; tankage, 50 pounds. When the price of wheat is relatively high, one-half of the wheat may be replaced by equal quantities of oats and barley. As soon as pigs reach 150 pounds in weight, they are then ready to fatten. With regard to the feeding of fattening pigs, 150 pounds to 210 pounds, the following meal mixture has been found by experience to be most useful and is recommended by the Division: Ground oats, 300 pounds; ground barley 700 pounds; tankage, 20 pounds. When the price is low enough, wheat may replace part of barley. When available, the addition of three per cent. fax-seed will improve the meal mixtures for weaning and fattening pigs.

Fifty Miles Of Roses

Garden At Kasanlik, Bulgaria, Is Largest In World

Amateur gardeners are now boast of their fine roses—with some justification in most cases this year. The right answer to their enthusiasm is to refer with a reference to the REAL rose gardens at Kasanlik, Bulgaria, the largest in the world.

Around Kasanlik it is possible to ride for fifty miles and see hardly any plants but rose-trees. There are more than a hundred villages in the district and nearly all the inhabitants are engaged in making attar of roses—the chief reason of course, for the existence of the gardens.

Fifty miles of roses make our own suburban gardens seem pretty insignificant.—London Sunday Pictorial.

Constitutes a Record

Mackintosh of Mackintosh who is 82 years of age presided at the annual dinner of the London Inverness-shire Association the other night for the fifty-second year in succession—a record. He is enjoying his visit to London immensely. The Mackintosh is a close friend of the King, and in proposing royal toasts he always makes a brief reference to the King, the Queen, the Prince of Wales, the Princess Royal, and other members of the royal family—an unusual custom.—Glasgow Herald.

Daylight Saving In Finland

Finland is the latest nation north of the Equator so far as summer-time is concerned. The clocks did not go forward until June 20th. South of the Equator, of course, summer-time doesn't start until September or October, and that's pretty high on the wintertime. In one country it's always daylight saving time. In Soviet Russia all clocks are one hour in advance permanently—summer and winter.

The Department of the Interior's 1933 expedition to the eastern islands of the Canadian Arctic Archipelago sailed from Montreal on board the Hudson's Bay Company's steamship, "Nascopee," on the morning of July 8, beginning one of the most extensive patrols undertaken in many years. This year's visit to the northern posts will be extended to points in Hudson and James Bays and in addition to the regular inspection will also make a study of plant life, mineral occurrences, and parasites. It is expected that the voyage will cover about 12,000 miles and will be completed late in September or early in October.

Major D. L. McKend of the Dominion Lands Administration is again the Officer in Charge with Dr. W. C. Bethune, also of the Department of the Interior, as assistant. Mr. A. Philip Norton is Secretary and Historian; Dr. J. A. Balfour, Department of the Interior, Ship's Doctor during the northward patrol; Dr. M. O. Malt, Department of Mines, Botanist; Mr. W. E. K. Midgitt, Department of Marine, Meteorologist; Dr. H. C. Cunningham, Department of Mines, Geologist; Dr. Ivan W. Parnell, Macdonald College, Parasitologist; and Captain T. E. Smellie, Ship's Master. Dr. Balfour, the Ship's Doctor on the northward voyage, will disembark at Pangnirtung, Baffin Island, to continue the work of Dr. L. D. Livingston as assistant officer on Baffin Island. Dr. Balfour will remain there for two years, Dr. Livingston returning to Ottawa with the expedition.

Inspector T. V. Sandys-Wunsch is in charge of the Royal Canadian Mounted Police party with the expedition which consists of the following: Corporals W. G. Kerr and H. Kearney, and Constables S. S. Spalding and A. E. Fisher. Corporal Kearney will join the detachment at Craig Harbour, Ellesmere Island, while the others will relieve members of the force at other posts who have completed their tour of duty in the North.

Eighteen ports in all will be visited by the ship. During the voyage the supplies will be distributed to company trading centres particularly in Hudson and James Bays. The first call after leaving Montreal is made at Cartwright, on the Labrador Coast, where the ship will call at the entrance to Hudson Strait, and the following points in the order named: Lake Harbour, Stupart Bay, Wolstenholme, Cape Smith, Port Harrison, Charlton Island, Churchill, Southampton, Port Burwell, L'Anse-au-Loup, Port Burwell, Dundas Harbour, Craig Harbour, Pond Inlet, Clyde River, Pangnirtung, Cartwright, and St. John's, Newfoundland. The usual call at Godhavn, Greenland, to exchange courtesies with the Danish officials there will be made on the return part of the patrol. Possibly after the call at Clyde River, Baffin Island, Lake Harbour, Pangnirtung, and Pond Inlet are on the return part of the patrol. The ship will then call at Devon Island, and Craig Harbour is on Ellesmere Island. They are all Government posts and among the chief objects of the expedition is to re-provision these posts and to effect changes in the personnel.

Dr. Malt, the botanist with the expedition, will make the entire voyage. Dr. Cunningham, geologist, will leave the ship at Cape Smith on the east coast of Hudson Bay and cover the area between there and Wolstenholme at the western entrance to Hudson Strait, rejoining the expedition when the boat makes its second call at the latter port. Dr. Parnell, parasitologist, will disembark at Charlton Island and carry on his studies in that area. Dr. returning a ship by rail from Neoshoes.

All Metal Homes

New Process For Making Marble-Surfaced Steel

Preparing for an era of all-metal homes, the Mellon Institute announces a new marble-surfaced steel. The stone effect is imitation, made by a laminated resin surface woven inseparably with the metal. Any other finish made with the new laminated resin can be added in this manner, it can be made to imitate wood.

Decorative finishes already are applied to steel by other methods, the announcement states, but says this is the first process to make the surfaces such an integral part of the metal.

The adhesive is an alloy, such as tin or zinc, which fuses with both the steel and the covering.

WORLD HAPPENINGS
BRIEFLY TOLD

The four-power European peace pact has been signed here by Premier Mussolini, and representatives of France, Germany and Great Britain.

Sixty Jersey cattle, including three bulls, valued at more than \$10,000, left Jersey on their way to their new owners in Canada and the United States.

Drought in parts of Southwestern Africa is now in its eighth year, and many farmers have been ruined while others are trekking over the country with their cattle in search of grass.

During the four weeks ended June 30, Canadian grain exports through New York totalled 2,425,000 bushels, a decline of 2,027,000 bushels from a year ago.

With several thousand men on the waiting list desirous of entering the Royal Canadian Mounted Police, the list has been practically closed for the time being.

Edmonton lists the most air-minded city in Canada, according to Col. George A. Drew, of Toronto. Addressing the Empire Club at Vancouver, Col. Drew said Fort McMurray, north of Edmonton, was the greatest aviation centre in Canada.

There was a very definite pick-up in the exports of Canadian agricultural products to the United States in June, the value of the total being \$546,000 compared with \$217,000 in June, 1932, a report of the Dominion Bureau of Statistics said.

The "Royal Scot," crack British railway train now on show at the Chicago Exhibition, will likely visit Winnipeg this fall after the close of the Chicago Fair, according to a letter received by Mayor Ralph Webb from the Montreal representatives of the London, Midland and Scottish Co.

With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissioner, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased export trade with the Soviet Union, officials said.

Parasitological Research

McGill University To Investigate Parasitic Diseases Of Domestic Animals

Last year's report of the Empire Marketing Board referred to a decision of the board to share with the National Research Council of Canada the cost of maintaining an Institute of Helminthology (study of maw and intestinal worms) at Macdonald College, McGill University, Montreal, for the investigation of parasitic diseases of domestic animals.

The laboratory buildings have been completed and equipped during the year with funds provided by the Quebec Government. Dr. T. W. M. Cameron, formerly of Edinburgh University, has been appointed director of the institute and work started on April 1, 1932. The establishment of the institute has been welcomed by agricultural and lay opinion in Canada. The administration of the work is under the control of a specially appointed associate committee on Parasitology of the National Research Council, of which Dr. H. M. Tory president of the council, is chairman.

Prince Buys Sixth Plane

Newest Machine Has Armchair Seats For Passengers

The Prince of Wales has purchased another aeroplane—his sixth. The new machine is a De Havilland Dragon Moth, with a maximum speed of about 130 m.p.h.

It is a biplane with six arm-chair seats for passengers in the cabin, and separate accommodation for the pilot in the cockpit. The arm chairs are upholstered in scarlet leather and the cabin is decorated in fawn and red. The plane is two-engined with 260 h.p. It is finished, like all the prince's planes, in the red and blue of the House of Windsor.

Flight-lieutenant F. H. Fielden, the prince's personal pilot, took the machine across the channel on a test flight. The prince intends using it himself.

Egypt Building Big Dam

The British firm of Messrs. J. W. Gibbons, has been awarded by the Egyptian Government the big contract of building the Gebel Aulia dam, a few miles south of Ikhartum. Their tender was for \$10,390,430. Four firms, all British, tendered for the contract. It is estimated that the building of this dam will increase Egypt's cultivable land by 300,000 acres, and will take four years.

Winnipeg Newspaper Union

By Ruth Rogers

529

FOR MATRONS OR YOUNGER WOMEN WHO FEEL THEY CAN SUPPORT SLIMMING LINES

Here's a snappy Paris model you can make at just the cost of the material.

It is a dress you can wear and always look smart.

It is a black and white conservative checked soft crinkly crepe silk. It depends entirely on its lines for its smartness. It needs no further adornment.

It has the slimming wrapped bodice and interesting curved hip seamings to lengthen the silhouette. The sleeves not too full, puff just above the wrists which give a certain grace to the hands.

Printed or plain crepe silks are equally smart to fashion it.

Style No. 529 is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 38 requires 4 yards of 36-inch material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coil carefully.

Shined Thousands Of Shoes

Colored Man Has Been Railway Porter Forty-Six Years

In forty-six years of service as a porter at the union station of the Maine Central and the Boston and Maine railroads, in Portland, Moses Green, colored, figures he has put a bright gloss on approximately 671,000 shoes, and grinded for 335,000 customers.

What's more, he figures that about \$1,500,000 worth of shoe leather has gone under his polishing cloth. He is known to travellers from all over the world who come to Maine for their vacations.

Bad Times Man-Made

Dr. Beaumont, English poet, wrote in the seventeenth century "If we would rightly scan, it's not the times are bad, but man." The comment is still correct. Messes are mostly man-made. There is an occasional catastrophe brought by the forces of nature. But natural disasters do not measure in effect with man's economic, social, political blunders. We are tripped by our own stupidity.—Brandon Sun.

Famous Liner Scrapped

After considerable delay the liner "Baltic," once a renowned floating palace of the Atlantic service, is being scrapped in the shipbreaking yards at Osaka, Japan. The ship, which had been purchased at auction, arrived there last March, but before it could be towed into the harbor the shallow river bed had to be dredged to a depth of more than 19 feet.

HOUSEHOLDER: "And, as a lawyer, I can assure you that your sentence will be no light one."

INTRUDER: "I've got to 'and it to you, Guv'nor. You're a real smart feller. I suppose you wouldn't care for the job of defendin' me?"

Old Document Found

Letter Written In 1876 Offered Judgeship To Nova Scotia Senator

A letter in which Canada's second premier, Alexander Mackenzie, offered a judgeship to Senator William Miller of Antigonish, N.S., in 1876, has been found and presented to the provincial archives.

Written in the premier's hand-writing, the letter reads: "My Dear Sir: We expect within a few days to make the several appointments to the county court in Nova Scotia as the local government desires to issue the proclamation provided for by the statute."

"I write to request you to allow me to submit your name to his excellency for the Cape Breton district."

"Mr. Blake left for England three weeks ago, or he would have communicated with you on the subject. I know, however, that your nomination will be entirely satisfactory to him, and I have every reason to believe that it will give general satisfaction in the district and in the province."

"I will feel greatly obliged by receiving your early answer, and remain, My Dear Sir, Yours Faithfully, A. Mackenzie."

Heavy Tourist Travel

Indications That Visitors To National Park Will Exceed Peak Year Of 1929

Tourist travel in Canada's national parks this season has given indications of equalling in volume the peak year of 1929, according to information reaching Hon. T. G. Murphy, Minister of the Interior. The first day of July marked the opening of the season in most national parks, particularly in the Rocky Mountain region, and the number of visitors over the Dominion Day holiday is usually taken as an indication of what the season will produce.

At Banff national park in Alberta, all available accommodations were occupied on Dominion Day and many tourists slept in their cars it was reported.

These have been wonderful years for the type of young married people who are drawn closer by early struggle.

It's as simple as this. The nations must come to peace or go to pieces.

Recipes For This Week

(By Betty Barclay)

CHEESE SOUFFLE

3 tablespoons quick-cooking tap-

1 cup milk, scalded.

1 cup grated cheese.

3 egg yolks, beaten until thick and lemon-colored.

3 egg whites, stiffly beaten with 1 teaspoon salt.

Add tapocin to milk, and cook in double boiler 15 minutes, or until tapocin is clear, stirring frequently. Add cheese and stir until melted. Cool.

Add egg yolks and mix well. Fold in egg whites. Bake in greased baking dish, placed in pan of hot water, in moderate oven (350 degrees Fahrenheit).

Souffle is done when it shrinks a trifle and is brown. Serves 4.

When made with quick-cooking tapocin and properly baked, souffles do not fall, but stay tender, moist and light while being served.

RASPBERRY ICEBOX PIE

1 cup small vanilla wafers, rolled fine.

1 package raspberry gelatine dessert.

1 pint raspberries.

½ cup cream, whipped, sweetened and flavored.

Roll wafers fine and line buttered pie plate with the crumbs. Prepare gelatine according to directions on package. Chill and when beginning to set, pour into crumb lined plate and chill. When set add a layer of fresh raspberries and cover with whipped cream. 6 portions.

Not Human Nature

The shop assistant wrapped up the customer's parcel and dextrously handed it to him.

"There you are, sir," he said, "and if the goods are not just to your liking we will cheerfully refund the cash."

Farmer Giles sniffed.

"Don't ye tell me such a yarn, young man," he replied.

"Eh? What?" exclaimed the assistant, momentarily taken off his guard.

"Ye might gie me my money back," said the farmer, "but 'tain't human nature to be cheerful about it."

It is estimated that there are nearly 125,000 kinds of flowering plants.

SUNDAY SCHOOL LESSON

JULY 30

GIDEON

Golden Text: "Jehovah is the strength of my life: Of whom shall I be afraid?" Psalm 37:1.

Lesson: Judges, Chapters 6-8.

Devotional Reading: Psalm 68:1-4.

Explanations and Comments

The Faith-Hearted Depart, verses 1-3.—Gideon and his band were to fight the Midianites under God's banner, and to God must be accorded the victory. Let them should boast of having themselves defeated the enemy, their numbers must be reduced. Gideon therefore directed all who were fearful to depart, and more than two-thirds of the warriors left the camp. Possibly the men who had bragged most of what they would do to the Midianites were the very ones who were afraid when they stood on the height and looked at the encampment of the enemy spread along the opposite side of the valley. The Crusaders who were the boldest in the council-chamber were the first to cry, "Save us, O Lord!" (Let him who can save himself, let him do so.)

When God needs men for His work He chooses the hearts courageous. When the battle sounds the martial note, some one has observed, there are many in the Church who suddenly remember an engagement that prevents their joining in the battle. The proportion of cowards at Gideon's camp was two in three. Would it be as low in the moral battlefields of today?

The Force Reduced To Three Hundred, verses 4-8.—"The number of God's army looked well, but God took to auditing it, He audited the figures, and a most savage audit it was" (McNellie). Gideon brought his army to the water and there tested them further. All but three hundred "bowed down upon their knees to drink." The Hebrew for this is said to mean strictly "to drink by putting the mouth in the water," as, for example, a horse or an ox does. Three hundred of them carried the water to their mouths with their hands, "lapped it with their tongues, as a dog lapped," and these were the men chosen to fight.

Russia Spoiled Plans

Of Finnish Aviator

Flier Was Not Allowed To Go Up East Coast

Bronzed by sun and wind after 16,000 miles of flying which would have taken him more than half way around the world if it had not been for international complications, Captain Walno Bremer, young Finnish aviator, brought his monoplane to rest at the Ottawa air station. His Atlantic flight was cancelled.

Captain Bremer left Finland on May 1, intending to fly his small all-metal plane, which took him to Cape Town and back last year, around the world. After successfully navigating the route over Germany, Arabia, Persia, India and China, he finally arrived at Yokohama. From there he intended to fly to Vladivostok, in Siberia, and so on to Nome, Alaska.

However, Russian officials refused to allow him to fly up the east coast so he was forced to ship his plane to Ottawa.

Chinese Buying Planes

Three thousand fighting airplanes will be placed in service in the next three years by the Chinese Nanking Government, General Chih Jon Chow, young commander-in-chief of aeronautics, announces. General Chih said he was examining various types of planes in the United States.

If you print any more jokes about Scotman I shall cease borrowing your paper," writes a man from Aberdeen.

Fine Piece Of Legislation

Special Permission Required To Carry Firearms In Canada

One of the finest pieces of legislation that have been passed in many years is now in force, and hereafter no one in Canada is permitted to carry firearms without special permission. We are fairly clear of the Southern European habit of carrying knives, but the very bad habit of carrying guns, revolvers and other forms of pistols, automatic, etc., has crept over from the United States and leads often to fatal results in quarrels which, were they properly confined to the good old British weapons of the fists, would be comparatively harmless.

Foreigners from the less civilized parts of the world, seem to think that guns are necessary in Canada, but such is not the case, and most of us can go through life without ever seeing one of these weapons, and certainly without having to use one. When it is widely known that guns are no longer lawful, and those who carry guns become objects of suspicion, it will be better for all concerned. Even thieves and burglars do not need guns. They are not used in Britain except by imported American criminals, and the police do not need therefore to use them either.—Hamilton Herald.

Canadian Landscapes

Exhibition Of Water Colors Showing In England

London's gallery-goers are showing keen interest in an exhibition of water colors, many of Canadian scenes, being shown at the Graham Gallery in New Bond Street. Miss Galleries except by imported American criminals, and the police do not need therefore to use them either.—Hamilton Herald.

Miss Harper, great admirer of Canadian landscape, has painted scenes as far north as Hudson Bay and includes in the present exhibition pictures done at Windsor, N.S., Ottawa, the Rockies and as far west as Vancouver. Among her subjects are: "Mount Edith Cavell," "Mount Robson," "Great Trees, Stanley Park," "A Sunrise on Hudson Bay," "Moose Factory," and "Scenes on the Moose River in Northern Ontario." "The Lions, Vancouver," "Grouse Mountain," "Lake Louise and Emerald Lake."

Capture in her strong water colors of Canada's brilliant atmosphere as well as the country's more sober moods occasioned much favorable comment. Her show contains also pictures painted in New York and in the West Indies.

An African Superstition

Natives Believe Babies Should Be Smoked Over Fire

One of the most peculiar tribal customs among natives of darkest Africa, is the superstition that a baby must be held over the smoke of a camp fire in order to make it "pure" and such a baby must not associate with one which was not "smoked" as an infant.

Such was the report of Miss Ruth C. Cowles, R.N., at Johannesburg, South Africa, a nurse of the American Board of Commissioners for Foreign Missions. She is a native of New Britain, and her parents live in Alhambra, California.

"But we are gradually proving," Miss Cowles wrote, "that such superstitions are groundless, and that those, smoked or unsmoked, are safe in the hands of our native Christian nurses."

A Mystery

Safe Stolen Two Years Ago Is Found On Prairie

Believed to be the same safe stolen from Harnsworth, Sask., two years ago, a safe was "blown" on prairie land, near the Black Hawk mine at Bismarck, over the week-end, headquarters at Regina. There was nothing in the safe but papers.

During the two years elapsing since the Harnsworth safe was stolen, no trace of it was found. Mounted police are working on the theory that those responsible for the theft secreted the safe on the prairie near the Bismarck mine where it was found and "blown" by a second gang over the week-end.

Exhibit Draws Crowds

Canada's exhibit at the Century of Progress Exposition, Chicago, is drawing a daily attendance of approximately 15,000 persons, according to information reaching the Department of Trade and Commerce. This number represents about 15 per cent. of the total daily attendance at the exposition.

IRISH DELEGATE REPROVED BY CONFERENCE CHAIRMAN

A sensation was caused in the economic commission of the World Economic Conference when Hendrick Colijn, Dutch Prime Minister, as chairman of the commission stopped Joseph Connolly, Irish Delegate, from speaking. Mr. Connolly (above inset) was supporting the Soviet proposal for an economic treaty and began an attack on Great Britain's economic actions against the Irish Free State. Premier Colijn interrupted to advise Mr. Connolly not to stray from the subject under discussion and the Irish delegate sat down. Our main picture shows Premier Colijn indicated by arrow.

POLICE QUELL WINNIPEG RIOT WITH TEAR GAS

Winnipeg, Man.—About 1,000 unemployed demonstrators bent on airing their grievances over being out of the out-patient department of the Winnipeg General Hospital, stormed the city hall here Thursday in an attempt to interview the civic unemployment relief committee and police reserves were called out to quell the disturbance.

Charging the yelling and milling demonstrators with tear gas bombs, the policemen broke up the demonstration at the rear of the city hall, but the demonstrators quickly ran to the front of the building on Main Street, Winnipeg's main thoroughfare, where they demanded an audience with the civic unemployment relief officials.

Extra police reserves were called out, bringing the number of officers to 120. The mob was slowly edged down Main Street, to a small lane, where they obtained bricks and stones and pelted the officers.

Several officers were struck by flying missiles, but none was seriously injured. Constable A. Bond was taken to police headquarters with a cut on the head and Constable A. Singleton was removed suffering from effects of the tear gas bombs.

All traffic on Main Street was blocked. Police were forced to bring their batons into play when several hundred of the more radical demonstrators charged down a back alley in an attempt to storm the police station. A cordon of policemen was thrown across Main Street and the demonstrators staggered blindly about in the gas, subdued and temporarily broken up.

Police revealed they had taken six men into custody.

Visiting Western Provinces

Trip Of Dominion Liberal Leader To Last Five Weeks

Ottawa, Ont.—On the first stage of a western trip which will occupy five weeks and probably take him to all three prairie provinces, Rt. Hon. Mackenzie King, Dominion Liberal Leader, left Ottawa July 19.

The Liberal leader may visit the World Grain Institute at Regina. He will go to his own constituency of Prince Albert for a couple of weeks.

Mr. King may also visit the constituency of Mackenzie, Sask., where a by-election is still the seat of success by the appointment of Mr. N. Campbell to the tariff board is to take place.

No Stabilization Plan

No Action Yet Taken With U.S. Dollar Or With Sterling

Ottawa, Ont.—No action is being taken with the United States dollar or with the sterling. Accordingly the Canadian dollar cannot be said to be definitely linked up with either. This was the explanation given here when the discussion over empire currencies in the British House was referred to government officials.

Leslie Hore-Belisha, financial secretary to the treasury, told the British House that no fresh proposals were under consideration for the stabilization of empire currencies.

Prominent Rotarian Dies

Vancouver, B.C.—James W. Davidson, former Calgary business man and prominent Rotarian, died here following a lengthy illness. He was 61 years of age. Mr. Davidson was a former president of the Crown Lumber Company in Calgary. He had spent two years travelling in India, the Orient, Australia and New Zealand organizing Rotary clubs.

Glasgow Nurse In Rifle Shoot

Bisley Camp, Eng.—A Glasgow nurse and daughter of a famous military family, Miss Helen Rottenburgh, was one of the five women competitors at the classic King's prize service rifle match opened in the National Rifle Association empire meeting. There are nearly 1,000 in the King's shoot and 14 are from Canada.

Much Suffering In Russia

Hamilton, Ont.—"I never saw such suffering in my life," was the comment of Humphrey Mitchell, a member of parliament for West Hamilton, in writing of life in Russia under the Soviet regime. Mr. Mitchell has been visiting the U.S.S.R. and at present is in Germany. His message was addressed to Mayor John Peckles.

W. N. O. 2004

Trade With Russia

Great Britain Looking For Greatly Increased Business

London, Eng.—With an Anglo-Russian economic warfare ended as a result of negotiations between Maxim Litvinoff, Soviet Foreign Commissar, and Sir John Simon, Secretary for Foreign Affairs, Great Britain is looking forward to a greatly increased trade with the Soviet Union, officials said.

Steady progress is being made towards a new trade pact to supplant the one scrapped at the beginning of the economic troubles, which reached dramatic heights with the trial of six British electrical engineers on charges of sabotage and bribery in Moscow.

Products such as timber and a good outlet in Great Britain, and the new trade pact will facilitate such business.

The projected accord also will enable Great Britain to exert more pressure on the Soviet Union for a correction of Russia's unfavorable balance of trade.

Any increase the British will gain in the Russian markets will be mainly at the expense of Germany, where half of all the Russian purchases abroad have been placed.

Manitoba Crops

Drouth and Hoppers Reduce Yield In Many Sections

Winnipeg, Man.—Varied crop prospects in Manitoba, ranging from excellent in the area north of Riding Mountain to poor in the extreme southwestern corner, are reported in the summary issued by the Manitoba department of agriculture.

Absence of adequate rain and grasshopper damage continue as outstanding factors. Rain has been insufficient for seven weeks. A considerable section of the Red River Valley and a strip across southern Manitoba near the Dakota boundary are now infested with full-grown, flying hoppers, says the report.

Rather than chance loss through drouth and hoppers, some farmers are cutting their crop for green feed.

Conversion Loan Plan

Great Britain Is Seeking To Convert War Loan

London, Eng.—Great Britain, seeking to convert 5½ per cent war loan bonds floated in the United States in 1917 into 2½ per cent sterling bonds, asked the American holders to accept abrogation of the bonds' gold clause.

As an inducement an offer was made of conversion of each old 5½ per cent \$1,000 bond into a sterling bond of £260—that is, at the rate of \$3.84 against the parity of \$4.86 which the United States dollar and pound exchange rate touched Wednesday.

The bonds were floated just before America entered the Great War in 1917.

British Empire Conference

Advances Proposal For Empire To Discuss Its Own Affairs

Melbourne, Australia.—Australia joined in the expressions heard elsewhere, official and unofficial, to the effect the empire should hold its own conference if the World Economic Conference proves a failure.

Addressing a gathering of ex-servicemen here Hon. H. G. Latham, Attorney-General in the Commonwealth Government, declared: "If the World Economic Conference fails I earnestly hope an attempt will be made to hold a British Empire conference at which empire affairs may be placed upon a co-ordinated and co-operative basis."

Sunken Continent

Submerged Continent In Pacific Twice The Width Of America

San Diego, Cal.—Captain C. B. Mayo, who as captain of the naval tanker "Ramapo" plying between San Pedro and Manila made an extensive study of the ocean bottom, said he had mapped a submerged continent in the Pacific twice the width of America. Last May Captain Mayo discovered a new deep with the same depth under the coast of Japan, where the bottom fell away to 8,501 fathoms. It was one of the greatest ocean trenches ever discovered.

Seeking Church Control

Berlin, Germany.—Rudolph Hess, Chancellor Hitler's general representative, ordered all Nazis to register for church elections, which are expected to deliver German Protestants into hands of the Nazi Government.

Seeking Information

Definition Of Political Partisanship Asked By B.C. Postmasters

Vancouver, B.C.—Wanted: A definition of political partisanship.

The Dominion Government will please address reply to the British Columbia Postmasters' Association, a convention assembled would like to know.

A postmaster who becomes politically active sometimes loses his job, and the department is being asked to define the character of this cardinal sin for those who handle the mails.

WHEAT GROWING NATIONS REACH AN AGREEMENT

London, Eng.—Henry Morgenthau, United States wheat negotiator, announced that the "Big Four" wheat producing nations had reached an agreement with Danubian countries providing for restriction of exports from the Danube area to 54,000,000 bushels this year and 50,000,000 next.

As regards the agreement with the Danubian states, assent was given on the part of Australian and Argentine experts for their countries, and final approval awaited the decision of the chiefs of the delegations.

There was reason to believe that an arrangement would be made with the Russian delegation fixing the Soviet export at 75,000,000 bushels.

The accord is held to be of the highest importance, since it represents the keystone of provision set up by Australian delegates to participation in an acreage restricting scheme, which is considered necessary to use up the large existing wheat surplus in order to raise prices.

Negotiations for an agreement regarding reduction of the world wheat acreage and exports have been in progress during the World Economic Conference here by spokesmen of Canada, the United States, Australia and Argentina.

The "Big Four" representatives went directly from a meeting with delegates from four Danubian countries—Hungary, Rumania, Yugoslavia and Bulgaria—to a session with Russian spokesmen.

The Danubians had first been asked to limit exports this year to 40,000,000 bushels and then conceded a volume of 45,000,000 bushels.

Upon representations, however, that this year's crop in those countries is likely to be very large, they conceded a quota of 54,000,000 bushels, providing that next year's amount will be limited to 50,000,000 bushels.

Gas Price Goes Up

Winnipeg, Man.—Gasoline prices advanced one-half cent a gallon Thursday for all grades in Manitoba, Saskatchewan and Alberta. Oil company managers said strengthening of prices for crude oil was the reason.

Wage Increase

Winnipeg, Man.—A 10 per cent increase in wages of overall makers employed by the Western Shirt and Overall Manufacturing Company was announced.

BEFORE CONFERENCE

Francis Edward Powell, chief of the International Sugar Board, who was called before the Sugar Commission at the World Economic Conference on the sugar situation.

Home and School Federation

Officers Elected At Biennial Convention In Port Arthur

Port Arthur, Ont.—Dr. G. W. Kerby, Calgary, was elected president of the Canadian National Home and School Federation at closing sessions of the third biennial convention here.

Other officers were elected as follows: Vice-President, Mrs. R. S. McLaughlin, Ottawa, Ont.; Provincial vice-president, Ontario, Mrs. McLaughlin; British Columbia, Mrs. A. E. Delmage, Vancouver; Alberta, Dr. Kerby; acting vice-presidents: Saskatchewan, W. J. Young, Saskatoon; Manitoba, John Haisard, Winnipeg; Maritime and Newfoundland, Miss Dora Baker, Truro, N.S.

Vancouver was chosen for the 1935 convention and the British Columbia federation's campaign was adopted as part of its policy by the organization.

Canadian Business Important

United States Pleaded To Note Recovery Of Canada

New York.—Commenting on the "evidence of wide-spread improvement of business in Canada," the New York Times says:

"That these gains have been made without any plan deliberately to depreciate the Canadian dollar offers further proof of the strength of national forces now tending to promote recovery."

The Times also notes: "The evidence of Canadian improvement is of special interest to the United States, inasmuch as more American capital is invested in Canada than in any other foreign country, and Canadian markets are second in importance only to those of the United Kingdom as an outlet for American goods."

Prince's Herd Big Winner

Edmonton, Alta.—The Prince of Wales' herd from High River was again a big winner at the Edmonton exhibition. In the Shorthorn class Princeton Marion won the junior and grand championship, also first on junior get-of-sire, progeny of dam and breeder's herd. Campbell Farms, of Moffat, Ont., showed the senior female champion, which was made reserve grand.

HAPPY JACK TARS ARRIVE FOR BISLEY

Our press photographer, looking around for an optimistic subject to "shoot," bumped into these naval trainees from H.M.S. Pembroke, arriving in Surrey to participate in the National Rifle Association meeting at Bisley. Judging by their faces, the long ranges at Bisley hold no terrors for them.

Assistance Given Manitoba

Says Province Should Make Own Arrangements For Financing

Winnipeg, Man.—Apart from the financial assistance rendered Saskatchewan in respect of areas in which there was a three-year crop failure, the Dominion Government has helped the province of Manitoba more than any other province, according to a statement issued by Hon. T. G. Murphy, Minister of the Interior, here.

The statement detailed financial aid given Manitoba, and claimed in view of the assistance rendered in connection with other responsibilities, it was incumbent on the Manitoba Government to make its own arrangements for financing direct unemployment relief.

Caught In Drifting Ice

Motor Schooner Delayed A Week Reaches Churchill Safely

Churchill, Man.—After nearly a week in the ice floes of Hudson Bay, the motor schooner "Fort Severn," Hudson's Bay Company, with Capt. D. G. Morris in command, docked here July 18.

When seen upon arriving here, Hugh Conn, district manager, said there had been no suffering. The "Fort Severn" had been caught in the drifting ice. When the wind was favorable the sails were raised and the ship moved slowly through the ice. A cargo of flour from the post at York Factory was unloaded. The ship loaded supplies for northern trading posts and sailed for Cape Eklimo.

C.C.F. MANIFESTO DECLARES WAR ON CAPITALISM

Regina, Sask.—What the Co-Operative Commonwealth Federation seeks for its new Dominion of Canada and how it aims to achieve its reforms is now before the public.

In a 4,000-word manifesto, issued on the opening of the first national convention of the organization here, the C.C.F. disclosed its program for a national planning commission to guide the nation in its transition, boards of management for control of public utilities and other social enterprises, and set forth the changes desired.

Under the new regime which the organization hopes to establish after the next federal election, when it will seek governmental power, banking and insurance would become socialized and gradually socialization would be extended to industry. First of the industries to come under public control would be transportation, communication and electric power production, to be followed by mining, pulp and paper, distribution of milk, bread, coal and gasoline. New policies for foreign trade and external affairs would be established and the system of taxation would be radically altered.

Throughout it all was sounded war on capitalism with the declaration "no C.C.F. government will rest content until it has eradicated capitalism."

"In the type of economy that we envisage," declared the manifesto, "the need for taxation, as we now understand it, will have largely disappeared. It will nevertheless be essential, during the transition period, to use the taxing powers along with other methods, as a means for providing for the socialization of industry and for extending the benefits of increased social services."

"At the present time capitalist governments in Canada raise a large proportion of their revenues from such levies as customs duties and sales taxes, the main burden of which falls upon the masses. In place of such taxes upon articles of general consumption, we propose a drastic extension of income, corporation and inheritance taxes, steeply graduated according to ability to pay. Full publicity must be given to income tax payments and our tax collection system must be brought up to the English standard of efficiency."

"We also believe in the necessity for an immediate revision of the basis of Dominion and provincial sources of revenues, so as to produce a co-ordinated and equitable system of taxation throughout Canada."

The manifesto assailed the "debt creating character" of present-day government financing. "The C.C.F. proposes," it said, "that in future no public financing shall be permitted which facilitates the perpetuation of the parasitic interest-receiving class; that capital shall be provided through the medium of a national investment board and free from perpetual interest charges."

EMPIRE PARLEY SLATED TO BE HELD IN LONDON

London, Eng.—"A little imperial economic conference" is going to be held at London as soon as the world economic conference is adjourned.

But from all indications all those sources that have been clamoring for an empire economic parley to take the place of the world conference, are going to be disappointed. On authoritative information it is learned the empire parley will concern itself only with ways and means of smoothing out the complaints that have arisen in various quarters from the working out of the Ottawa Imperial Conference trade pacts.

And these complaints will largely hinge on the widely publicized unrest among British agriculturists at a declining market they attribute to floods of agricultural produce coming in from the Dominions under the Ottawa pacts.

Whether the conference between representatives of the United Kingdom and empire governments will seek to arrive at any agreement on empire currencies, or any further steps towards empire economic co-operation at large, is doubtful. Voluntary agreements—and the "voluntary" is stressed to remove the existing complaints, are said to be the sole aim of the empire meeting.

Noted British Editor Dead

Viscount Burnham Was Prominent Figure For Many Years

London, Eng.—Viscount Burnham, noted newspaper proprietor, editor and publicist, died suddenly at his home here July 20. He continued his normally active life until two days before his death, when he attended a meeting of the joint select committee on Indian constitution reform, of which he was a member.

Viscount Burnham was a prominent figure for many years in numerous sides of British life. He was 71 years old.

He was best known for his association over a long and important period, including that of the Great War, with the Daily Telegraph.

Viscount Burnham virtually grew up in the Telegraph office, under his father, the first Lord Burnham, who died in 1914.

When a few years ago, he sold the newspaper he had been in journalism more than 40 years.

Seek Treasure

Plan To Recover Bullion From Sunken Lusitania

Chicago.—Plans to salvage the treasure reputedly on the liner "Lusitania," sunk by a German U-boat during the war, was revealed by Charles Courtney, president of the American Association of Master Locksmiths.

Courtney, who is en route to Cleveland, said work will begin in the liner, in the ocean off the Irish coast, as soon as weather conditions are favorable.

Although the ship's manifest, published shortly after she sank, listed no gold, the amount of metal aboard has been variously estimated from \$5,000,000 to \$10,000,000, Courtney said.

To Silence Gun

Vancouver, B.C.—The gun whose booming note at 9 p.m. has sent Vancouverites to watch-pulling for 39 years, will be silenced after Sunday night next. Its original purpose of supplying time for ship's chronometers having passed, the Dominion Government has decided to save its annual cost in powder of \$350. The gun was cast in 1916 and brought out to defend Esquimalt.

Ontario Election Soon

St. Catharines, Ont.—Intimating that there would be a provincial election in the "not too distant future," Premier George S. Henry, speaking at Lakeside Park, Port Dalhousie, said the people would have the opportunity to pass judgment, not alone on the Conservative administration, but also on the various solutions proposed by those in opposition.

Lumber Mills Re-Opening

Arnprior, Ont.—Announcement has been made here by the Gillies Bros., Ltd. of Brantford, about two miles from here, their lumber mills will commence operations on or about Aug. 1, after being shut down for two years. Approximately 125 men will be employed.

Siam expects to export 1,700,000 tons of rice and rice products in 1933.

Curtailing Wheat Production

Bushelago Rather Than Acreage Basis Gives Best Hope Of Success

The three Western Wheat Pools are unanimous in their opinion that, so long as world markets for wheat are disorganized by abnormally large world carryover, steps should be taken to secure an international agreement which would provide for the allocation of quotas to be delivered by the principal wheat exporting countries on the basis of world requirements. The method to be adopted by each of these exporting countries in controlling deliveries to the world's markets should be a domestic matter to be settled by each of these countries.

This statement was made in a recent address by George W. Robertson, secretary of the Saskatchewan Wheat Pool.

Briefly, the plan seeks to lift the unmarketable wheat surplus out of the "visible supply" altogether, and it would remain out of the "visible supply" so long as the international agreement was in force. The individual grower would be under no restrictions whatever as to acreage and production, but the maximum amount of wheat which he could market from any given crop would be fixed as a result of the quota agreement. How he treated the balance would be entirely in his own hands.

It would mean that reserves could be held on the farms themselves instead of being stored in elevators as a constant threat to price levels.

Acreage reduction by law is not favored. "The Wheat Pool organization," Mr. Robertson stated, "is of the opinion that legislation enacted in this country for acreage reduction would be exceedingly difficult, if not impossible, to enforce, and that the net result would be unsatisfactory to the producer."

"It would appear that a bushelago rather than an acreage basis gives the best hope of success in bringing about a better relationship between wheat production and consumption."

Natives Take To Exploring

University Graduates Of India Start Expedition On Foot

Their imagination fired and their spirit of adventure aroused by the success of the Houston Mount Everest Expedition, native Indians are going in for mountain climbing and exploration. At Ahmedabad an Indian student proposes to fly over the Himalayas, and an expedition on foot is now on its way to conquer the Pindari Glacier, in the United Provinces, near Nanga Devi, a 22,000-foot peak of one of the central peaks of the Himalayas. Nearly all the members of this expedition are university graduates. They will collect flora and fauna and take a film of their journey.

Bank Of England

To Be The Strongest Fortress In The British Isles

London's newest fortress is the Bank of England.

When the building is completed, bombs will be unable to harm it and high explosive shells will be useless against its walls.

Work on the "fortification" of the bank has been in progress since 1925 and it will be another three years before it is completed. Originally it was calculated to take about twelve years to make it the strongest fortress in the British Isles at a cost of about \$25,000,000.

Idea Not Very Good

Tokio Man Has Novel Proposal To Restore Prosperity

A novel proposal to bring back prosperity by increasing the public's purchasing power has been thought out by Mr. Monosuke Fukuzawa, of Tokio. He suggests that each of Japan's 80,000,000 inhabitants should be given a 500 note—good for a limited period. Everyone would have to spend his or her note before the "time limit" expired—otherwise it would be useless. The bankers, however, are rather skeptical.

Low Price Induced

"Can you imagine," said Estelle, the waitress. "That fellow I waited on just now said he would give me five dollars now. Did that mean five dollars each?"

"No," replied Tillie, the cashier, "that's five dollars a hundred, of course."

"Hm-m! No wonder farmers are kicking," sighed Estelle. "Imagine, only a nickel apiece for pigs!"

W. N. T. 2024

English Postage Stamps

Some Slight Changes In Color and Design Are Contemplated

The drab English postage stamp, showing only a picture of the ruling sovereign, is to be altered but only slightly.

Sir Kingsley Wood, Postmaster-General, announced this while addressing a banquet of the philatelic congress in London. He said:

"Great Britain, early next year, will have an issue of new stamps as the present expires at the end of the year. I hope to take the opportunity of making some changes in design and possibly color."

"It is not proposed to alter the size or the general character of the stamps which will of course bear the head of the king."

"Criticism is sometimes made that our stamps remain unaltered. It is the valued tradition of Great Britain that our stamps should bear the effigy of the ruling sovereign. They are distinguished also by the fact that it is unnecessary for them to bear the name of the country of issue."

"Any variation of size would mean the complete alteration of stamp machines, of which there are 9,000 in London alone."

Feed Shortage

Farmers In Drought Areas Advised To Conserve Old Straw Piles

Fearing a shortage of feed and fodder in drought affected areas of Saskatchewan, government officials are urging councils in adjoining municipalities to conserve all old straw piles.

Hon. Howard McConnell, Minister of Municipal Affairs, attended a meeting of representatives of 11 municipalities, at Davidson, where the matter was placed before the meeting by municipal delegates. They were alarmed at the possibility of a serious fodder shortage.

Mr. McConnell said that every indication was that a measure of direct relief would have to be provided for these municipalities, but that he had taken the stand that the government could not supply feed and fodder for feeder cattle, but that in so far as work horses and milch cows for production for home consumption that the attitude in this regard would be different.

Porcupines Of The Sea

Globe-Fishes Can Make Themselves Immune From Attack

Various sea-creatures, like the moon, wax and wane in size. Some have the power of growing larger than normal as a temporary expedient, then reducing themselves. Others regularly grow smaller, and then start life afresh. The fishes called globe-fishers or puffers, and their relatives, the porcupine-fishes can by swallowing water or air, make their bodies swell up like balloons. They are too roundish in shape to be fast swimmers, but they wear an armor of spines which appear as a truly terrible palladium when they puff themselves up and float. No predatory fish dare attack these porcupines of the sea. When they deflate themselves, by expelling the air, a loud hissing sound is produced.

Accident Was Lucky

Curcsey Smuggler On Jugo-Slavian Frontier Almost Got By

Completely dumb in appearance and behaviour, a woman tried to cross the Jugo-Slavian frontier into Italy, at Susak. She was searched as a smuggler of foreign currency, but none was found on her. A clumsy official straightening up suddenly, however, knocked her on the chin with his head. The woman ejected lowered by a volley of choice oaths. The packet was found to contain nearly \$500 in notes of large denomination tightly rolled and wrapped in waterproof paper. The money was confiscated and the woman imprisoned.

Was Shipping Magnate

Sir John Ellerman, Richest Man In England, Is Dead

Sir John Ellerman, shipping magnate and reputedly the richest man in England, died recently at Dieppe, France. He was 71 years old.

Sir John, created a baronet in 1905 was controlling owner of the Ellerman, City, Hall and Buckland lines, and other steamship companies. Formerly he was principal owner of the Leyland line.

Sir John was believed to be worth more than \$30,000,000. The shipping magnate's income was estimated at \$1,000,000 yearly, yet he lived in one house in Mayfair and owned his Scotch castle three years ago.

IS THIS A RECORD FOR GERMINATION?

These stands of wheat were taken from one of the plots at Indian Head, Saskatchewan, Dominion Government Experimental Farm, and are from seeds taken from one of the 10,000 samples taken from 2,700 entries received from over 20 different countries in the competitive classes at the World's Grain Exhibition and Conference. The seeds were placed in the ground on May 1st and plucked on June 22 in full ear with all shoots strong, clean and healthy.

Light According To Job

Whitehall Officials Grade Candle Power Of Electric Lamps

The high officials of Whitehall have decided that the power of the electric lamp that lights a man's desk must be in strict ratio to what he earns.

When the electric light was first installed in Whitehall a great social error was committed.

Every one from the highest official to the most junior clerk was given a lamp of the same candle-power.

That system, which continued in force for years, is now being righted.

All electric lamp bulbs are being removed and new bulbs substituted under the following order:

Junior clerks—30 candle-power. Higher clerks—50 candle-power. Quite important clerks—100 candle-power.

Permanent under-secretary for state—200 candle-power.

A high treasury official has written a poem of praise:

"The minister rich just presses it switch
And a floodlight illumines his pages.
The poor junior clerk has to work
In the dark
As his chief has been doing for ages."

The new system is now in working order.

World's Highest Postal Lane

The men entrusted with carrying the mails from Tachiena, China, to Litang and Lhasa never drop below an altitude of 9,000 feet, never occasionally to 13,500 feet, and never sight a beacon light or a landing field. The world's highest postal lane is traveled not by airplanes but by Chinese mail carriers making the entire trip afoot.

New Diphtheria Serum

Will Immunize Six Months Old Baby For Life

The Alabama Health Department has developed a new diphtheria serum which it says will immunize a six-month-old baby for life by a single injection.

Dr. J. N. Baker, state health officer, said the serum had the approval of the national institute of health at Washington, and the Alabama committee of public health, and was the result of exhaustive research by the late Dr. Leon C. Havens, for 12 years director of the state laboratories here.

The health officer said the new precipitate toxoid was from 20 to 50 times as active as the crude toxoid.

Using Compressed Air

Spanish Engineer Has Invented New Type Of Plane

Compressed air is used as motive power in a new type of flying machine invented at Madrid by a Spanish engineer, Don Fernando Garrido. He hopes to achieve virtually vertical flying in this machine, and also to reach the stratosphere in it. Don Fernando is well known in Spain as the author of the scheme for boring a tunnel under the Straits of Gibraltar.

A Race Of Builders

Three hundred years ago apple trees were imported from Normandy into Acadia to lay the foundation of the now famous apple orchards of the Annapolis Valley. One hundred and fifty years later the United Empire Loyalists came to New Brunswick, Nova Scotia and Prince Edward Island. Today the three Maritime provinces have a population of more than a million people and with developed and undeveloped natural resources capable of supporting many times that number.—Financial Post.

London's Famous Squares

Stately Homes Being Crowded Out By Business Premises

London's famous squares are changing rapidly. Under the westward sweep of trade the stately old houses are being crowded out by business premises and flats, writes James A. Kilpatrick in the Overseas Daily Mail. Grosvenor Square is the last stronghold of Mayfair to be invaded; Lowndes Square is to follow; and work has just begun on a lofty block of offices in St. James's Square.

Soon the only record left of these charming bits of London will be a few old prints and pictures. Several painters give us fragments of this vanishing beauty at the Royal Academy, and architects show us what is going to happen when they have had their will with them. It is the way of progress.

There are 140 squares in London, ranging in size from Gough Square, that precious little relic of Dr. Johnson's day hidden away in the labyrinth of alleys behind Fleet Street, to the spacious acres of Trafalgar Square. Most of them are changing, and hardly any in the West End have escaped.

Popular Idioms Approved

"It Is Me" and Many Others Considered Good English

Mothers who have labored for years to remove from their youngsters' conversation such phrases as "It is me" and "Who are you looking for?" may leave off their praise-worthy, but vain, endeavors.

The National Council of Teachers of English recently voted to approve the following idioms as well established in good colloquial usage:

"It is me."
"Who are you looking for?"
"Invite whoever you wish."
"None are expected."
"Everyone was here but they all went home early."

"Pretty good."
"Awfully cold."
"I felt badly about it."
"Walk or drive or go slow."
"Move quick."
"Try and get well."
"Had rather."

Customs Subject To Change

People Find It Easy To Form New Habits If Necessary

The handshake is now frowned upon in Italy. When friends meet they are expected to exchange the Fascist salute—"handshaking," it is stated "is unhygienic." Well, perhaps the "no handshaking" order will produce the desired effect. Habits can be altered. The Chinese, accustomed in his own country to shake hands with himself when he meets a friend, soon falls into the Western custom when he comes to Europe. And discipline counts for a lot in modern Italy. Already kissing has been virtually abolished in the land of Mussolini—at least, in public. Censors cut out all the kisses from the films, and cinema-goers who supply their own find themselves arrested by the militia. Even holding hands in public is an offense punishable with a fine.

No Evidence Of Ability

Good Handwriting False Standard For Judging Says Headmaster

Good handwriting is no guide to ability, according to Dr. Terry Thomas, headmaster of Leeds Grammar School, speaking at a conference held by the Incorporated Association of Headmasters' Council in London. Many people, he declared, were prone to judge a boy's ability by his handwriting and his capacity for arithmetic. These were false standards, for most able people wrote a bad hand, and pure arithmetic denoted nothing but mechanical skill developed by practice.

Spends Pension On Air Trips

Englishman Neglects Weekly Income Limits Flights To Two

George E. Smith, aged 63, of Kingston Road, Merton, Surrey, England, is so fond of flying that he spends his old-age pension on aerial trips.

His one regret is that the weekly 10 shillings limits his flights to two. "I cannot understand young people being afraid of flying," says Mr. Smith. "It is the most exhilarating experience in the world, and each flight makes me feel 10 years younger."

"I would rather go without my tobacco than miss a flight."

"Everything that's bought goes to the buyer, doesn't it?"

"No. Some things such as coal, go to the cellar."

Beyond The Pale

Kidnappers Continue Their Frightful Trade In U.S. Cities

Eight American states impose or at any rate provide in their laws, the death penalty for kidnapping, with extortion as the motive. In thirteen the penalty is imprisonment for life. In all the others it is a long jail term. After the abduction and murder of young Charles Lindbergh last year, Congress in a mood of indignation made "inter-state kidnapping" a federal offense punishable by twenty years in prison.

Yet the kidnappers continue their frightful trade in American cities. The severity of the laws against them, seems to be no deterrent. The kidnappings of a recent week have been in Illinois where a kidnapper may be hanged, and in New York where he may be locked up 50 years. It is true but true to say that the most appalling of rackets still flourishes because of the uncertainty of punishment. The failure of the hunt for the kidnappers of the Lindbergh child shocked and alarmed the decent citizens. It encouraged those who were meditating like crimes, especially since an immense sum was paid in ransom and not recovered.

Among criminals the kidnapper seems somehow further beyond the pale than any other. Even a murderer sometimes shows great enough provocation to get sympathy from humans and gentle people. But one can never imagine an extenuating circumstance for the kidnapper. He is in league with fear, the worst enemy of the race. Every man's hand is against him. When he strikes, his fellow citizens are moved not only by wrath but by shame and dismay. That is how Americans feel about the kidnappers who terrorize their towns, but how to get rid of the blight seems to be, at the moment, beyond the wit of their police forces.—Winipeg Free Press.

Green Foods For Poultry

Dried Plant Leaves Contain More Minerals and Vitamins

Without doubt one of the most important considerations in choosing green foods for poultry is the form in which they should be given. Owing to the relatively small capacity of poultry, it is necessary to give them a very concentrated ration in order that they can consume sufficient food to produce the maximum amount of food products per unit of body weight of which they are capable. Green food is available in two forms, namely, as dried leaves of plants and fresh cut green. Since, as far as is known, the nutritive value of food, when under proper conditions, removes only water from the plant, dry leaves of plants contain proportionately more of minerals and vitamins than the fresh plant. This point is readily established by various tables of vitamins and nutrient contents of feeds in the new pamphlet on poultry feeds and feeding issued by the Dominion Department of Agriculture.

Cheapest Monarchy In World

Financial Relations Between King George and Taxpayers Profitable

The crown of Britain is the cheapest monarchy in the world. The taxpayers actually make a profit of \$740,000 (about \$2,600,000) out of the financial relations between the King and the state, for, though the King draws a nominal salary of £470,000, (\$1,880,000) he voluntarily relinquishes every year \$1,210,000, (\$4,840,000) in revenues from the crown lands. The King's real salary is £150,000 (\$440,000) a year. The rest of the civil list total is earmarked for salaries, expenses, and upkeep of the royal households and palaces. The sum of £12,200 (\$48,800) is spent every year on royal bounty and alms, apart from personal donations of the King and Queen. Only two of the royal residences, Sandringham and Balmoral, are the King's private property. They were bequeathed to him by King Edward.

Undoing Good Work

If Inefficient Teachers Are Hired As Matter Of Economy

It takes a lot of wisdom to economize wisely. The action some school boards throughout the country recall the old adage, "Penny wise, pound foolish." There is a tendency to overlook the good work that has been done by few and highly efficient teachers and for the sake of saving a little salary to engage young and untied teachers, to fill existing positions. In this way the work of building up a school over a period of years is practically undone overnight.

Artificial sunshine has lowered the death rate in the London zoo.

Madden Old-timers Defeat

Madden League Team

The old-time baseball players of the Madden district took on the Madden league team on Sunday last and handed the present day stars a 14 to 8 trimming.

Jesse Havens, Ed. Gilson, Homer Cano, Walter Sick and Albert Klitzke, were some of the stars of other days who helped themselves freely to the offerings of Don McArthur, ace pitcher of the Madden league team.

Mr. and Mrs. D. J. Hall, Mr. and Mrs. R. Nichol and Mr. and Mrs. L. Nichol enjoyed a very successful day's fishing on Silver Creek last Sunday. They returned with 24 speckled beauties.

About forty from the Onell district held at a very enjoyable picnic at the farm of Mr. and Mrs. J. R. Onell, near the Little Red Deer River, on Sunday. The day was spent in playing softball and swimming.

Mr. and Mrs. Chris. Christiansen and family also Mr. Christiansen's mother, returned today (Thursday) from an extended motor trip in the States. They visited the World's Fair at Chicago.

The next judging lesson for the Boys' and Girls' Club will be held at Willow Springs Ranch on July 31st at 2:00 p.m. Through the courtesy of Mr. F. Collicutt, everybody interested is cordially invited. Ladies please bring baskets.

The Floral Local U.F.W.A. will hold their annual Grandmother's Day meeting at the East Community Hall on Wednesday, Aug. 2, at 2:30 sharp. Miss Fanny Patterson of Calgary, will give a talk on her experiences among the Indians. The Carstairs Local have been invited to attend.

POLICE COURT NEWS

A complaint was made by Mr. Williamson of Carstairs, that a Buick roadster drove up to his gasoline pump at Carstairs last Sunday morning, and as a result four occupants of this car appeared in police court Monday morning at Carstairs, charged with stealing approximately six gallons of gasoline. Each of the accused pleaded not guilty to the charge, with the exception of the first man, who said he was not guilty of taking that much. In due course three witnesses gave evidence for the prosecution, Mr. Hemmingway, one of the accused, gave evidence on his own behalf, and swore on oath that he did not as much as take the hose nozzle down from the pump. He also admitted on oath (during the time he was in custody) that he did admit that he took some gas.

The accused were found guilty and taxed \$10.00 and costs each, or in default 30 days in Lethbridge gaol. One of the accused paid his fine Monday afternoon and stated that the above mentioned person was guilty. The other two paid their fines while in the guard room in Calgary and also admitted that gasoline was taken.

COMMUNICATIONS

The Editor
Crossfield Chronicle
Dear Sir:

I was requested by Mr. Murray the principal of the School of Agriculture at Olds, to write a letter to the Chronicle, telling the girls of the district about the Short Course that I won at the 1932 Crossfield Fair.

I arrived at Olds at nine o'clock Monday morning, July 17th. We started the day off with a ball game. After lunch we had our first sewing and cooking lesson. In the evening Mr. Murray welcomed the boys and girls. We had community singing. We finished the evening with a picture show.

Every morning before breakfast we had physical training for three quarters of an hour, and every day we had cooking and sewing lessons. There was something interesting every day. We took up lessons on poultry, horticulture and dairying. For evening entertainment we had dancing, field meet, concert. On Friday night we had a dress parade, showing off our pretty dresses we made during the week.

Saturday morning all the children left for their homes after a most enjoyable week which came to an end too soon.

Yours truly,

Miss Luella Jones.

Dog Pound Win First Game

of Bush League Play-off

Dog Pound 11; Cremona 7

Dog Pound won the first game of the play-off at Cremona on Sunday by a score of 11-7. Tom Borbridge pitching for the winners struck out 13, while Tronnes whiffed 10.

The next game in the play-off will be played at Dog Pound on Sunday, July 30, and if a third game is necessary it will be played at Bottrel on Sunday, Aug. 6.

Dog Pound and Cremona finished the league tied for first place with eight wins and two losses each.

BORN—To Mr. and Mrs. Roy McDonald of Bottrel, at Mrs. Collins' Nursing Home on July 18th, a son.

T. J. METHERAL DIES IN CALGARY

Resident of Moose Jaw for the past 19 years, Thomas John Metherral, 69 years of age, died at the residence of his daughter, Mrs. C. Q. Bown, 247 Eighteenth avenue northeast, Sunday morning.

He came to Calgary in June to visit his daughter. Born in Dundein, Simcoe county, Ont., the late Mr. Metherral came to Forward, Sask., in 1910, and moved to Moose Jaw in 1914. He had resided there since.

The late Mr. Metherral is survived by his widow, Mrs. Martha Metherral, Moose Jaw; five daughters, Mrs. Bown, Calgary; Mrs. S. M. Scott, Nipawin, Sask.; Mrs. E. G. Booth, Fargo, N.D.; Mrs. W. H. Brown, Winnipeg, and Mrs. C. J. Forrest, Fort William. One son, Lieutenant P. A. Metherral, R.A.F., was killed in France in June, 1917. Five brothers, J. P., Crossfield; R. E. and Willis, Weyburn, Sask.; R. W. Wapella; and George, Dundalk, also survive, as well as two sisters, Mrs. W. A. Hamilton, Lethbridge, and Mrs. William Creighton, Edmonton.

The remains were removed to the Foster and Foster funeral home and funeral services held at 3 o'clock Monday afternoon.

The Crossfield baseball team will play at Airdrie on Friday evening of this week. Two week's ago Airdrie shut out the locals by a score of 10-0. Crossfield was short several players on this occasion, but on Friday night the team will be at full strength. Heavy Williams with his fire ball will be on the mound for Crossfield.

Church of the Ascension

(Anglican)

Sunday, July 30th.

8:30 a.m. Holy Communion

3:00 p.m. United Service at Didbury of Olds, Hermiston, Didbury and Crossfield.

Social hour afterwards at Mr. Loties

United Church Services

The services on Sunday evening, July 30th, will be in charge of Mr. J. H. O'Neill of Calgary. Miss Freda O'Neill will give as a reading the first part of the book "He That Cometh."

Miss Hadden, one of Calgary's leading soloists, will sing.

Come and bring your friends to enjoy this service.

BASEBALL

Glen Williams, Everett Bills, Ronnie McFadyen, of Crossfield, George McKay, Carl Sahl, Cliff Durant, Carstairs, Jim McDowell, Airdrie, Dick Young, Mel Black, Irricana, Lefty Hodgins, and Buck Lapp, Calgary, have been selected to play a picked team at the Beiseker Sports on Wed., August 5th. The game will start at 5:30 sharp.

Glen "Heavy" Williams, playing for the Calgary Hustlers against the Bronks on Monday evening, collected two triples and a double out of five trips to the plate.

Motor and truck license plates reduced to one-half of original price on August 1st, 1933.

The Tuxis Boys, under the leadership of D. Tweedie, are leaving on Tuesday to spend two weeks camping at Sylvan Lake.

To Attend Calgary Track Meet
Margaret Fitzpatrick, holder of the Dominion record for 60 metres run, and the Alberta champion-ship in the running broad jump, will compete in these events at Women's Championships Track and Field Meet at the Mewata

Stadium, Calgary, July 29.
Veva Green will also compete in the running high jump, 60 metre run and the baseball throw. Dorothy Jones is competing in the 100 metres run; 80 metres hurdles and the running high jump.
